

Master in Biology

Immunology microbiology infectious diseases (IMID)

Presentation

The first year of the IMID master program entitled Molecular and cellular biology is meant to complete the general scientific background of the enrolled students in various fields of biology (cell biology, genetics and biochemistry) during the first semester. The second semester is devoted to introduce the students to their specific master 2nd year's program by offering them specialized courses. For IMID, the students will have at their disposal one UE for Immunology, one for microbiology, and one for Infectious diseases.

During this first year, the students will develop their written and oral skills for the search of internships and/or jobs as well as for the presentation of research projects and experimental results (mandatory modules of 3 ECTS - Communication tools - and 18 ECTS during the semester 7 of the master 1st year's program, 2 months internship during the semester 8).

The second year, first semester, of IMID master program comprises 4 specific and integrated UEs that goes from microbiology to infectious diseases, to immunity against cancers and infectious diseases to end with pathology and immunology. During this second year, enrolled students will have the opportunity to further improve their written and oral presentation skills. The semester 10 is fully devoted to an internship..

Registration and scholarships

Second year of the master's degree in Biology : To be eligible to apply, you should have completed (or you should be enrolled in) a first year of a master's degree in Sciences *i.e.* you should have validated 60 ETCS of a master's degree in Sciences by the end of your current academic year.

Public continuing education : You are in charge of continuing education :

- if you resume your studies after 2 years of interruption of studies
- or if you followed training under the continuous training regime one of the previous 2 years
- or if you are an employee, job seeker, self-employed

If you do not have the diploma required to integrate the training, you can undertake a [validation of personal and professional achievements \(VAPP\)](#)

Do you want to apply and sign up for a course ? Please be aware that the procedure differs depending on the diploma you want to take, the diploma you have already obtained and, for foreign students, your place of residence. Let us be your guide – simply follow this [link](#)

- 2 application campaigns are organized for the master 2nd year mention Biology
- Campaign 1 : Campaign opening on e-candidate from 02 to 20 March 2020 included
- Campaign 2 : Campaign opening on e-candidate from April 27 to May 15, 2020 included

Further studies

The students graduating from the Immunology, microbiology and infectious diseases (IMID) master program should be able to undertake a PhD research project in the fields of immunology, microbiology and/or infectious diseases. Consecutively to their PhD, the young researchers undertake one or two post-doctoral trainings of 2-3 years each, usually in foreign countries, in order to diversify their expertise.

Practicals informations :

- > **School** : UFR Chimie-Biologie
- > **Duration** : 1 year
- > **Course type** : Initial and Continuing Education
- > **Location(s)** : Grenoble - University campus

Program

Master 2nd year

UE Laboratory internship IMID (part II) 24 ECTS

Semester 9

UE Research project	6 ECTS	38h
----------------------------	--------	-----

2 option (s) to choose from 4

UE Fundamental and medical microbiology	6 ECTS	40h
--	--------	-----

UE Infectious diseases (part II)	6 ECTS	40h
---	--------	-----

UE Pathology and immunology	6 ECTS	37,5h
------------------------------------	--------	-------

UE Immunity against cancers and infectious diseases	6 ECTS	37,5h
--	--------	-------

1 option (s) to choose from 3

UE Cancer disease : experimental and therapeutical approaches	6 ECTS	40h
--	--------	-----

UE High throughput in biology	6 ECTS	36h
--------------------------------------	--------	-----

UE Biostatistics, bioinformatics and molecular modeling (part II)	6 ECTS	39h
--	--------	-----

Semester 10

UE Communication in scientific english (part II)	3 ECTS	
---	--------	--

UE Business plan of your start-up (entrepreneurship and science)	3 ECTS	24h
---	--------	-----
