

UE Neurophysiology

- **Teaching language(s):** English
- **Open to exchange students:** Yes
- **Code d'export Apogée:** YAX9BI12

Presentation

Description

Full lectures on cognitive, sensory, limbic and motor systems from expert contributors, e.g.:

- Neural basis of language
- Brain's rhythms: role and source
- Neural basis of conscious and non-conscious processes

Full lectures on physiopathology of non-degenerative diseases from MD and PhD contributors, e.g.:

- Epilepsy physiopathology
- Schizophrenia physiopathology
- OCD: new pathophysiological insights
- Drugs addiction and neuro-adaptation: hijacking of the reward system

Each year, a full day congress will be organized on a particular field, coordinated with other M2 NN modules.

Course parts

UE Neurophysiology - CM	Lectures (CM)	24h
UE Neurophysiology - TD	Tutorials (TD)	13,5h
Period : Semester 9		

Skills

From cognitive to cellular neurosciences learning through the study of pathophysiological processes.
