

# UE Laboratory internship (part I)

Component  
UFR Chimie-  
Biologie

- › **Teaching language(s):** English
- › **Open to exchange students:** Yes
- › **Code d'export Apogée:** YAMB8T00

## Presentation

---

### Description

During the second semester of the first year of the master's degree, students discover the research activity by participating in a lab internship. The official period of this internship is limited to 44 days.

For their internship, the students may choose laboratories from any university or institution in France or other countries. Students are encouraged to contact and visit as many labs as needed in order to choose the project and lab environment that fit with their personal interest.

In addition to a strong scientific background, the students must be motivated, serious, reliable, on time, independent, open to discussion, curious and self-organized.

**Period :** Semester 8
