Presentation

Description

In the framework of the Research Lab work, the students are integrated in a research laboratory one-day-per-week (in the first semester of Master WICS). Supervised by a researcher, they work on a research topic to acquire a first experience of research world.

At the end of this Lab work, an oral presentation based on the obtained results must be done by taking into account the scientific communication rules in international conferences (1 slide per minute (not more), title, authors, context, brief state-of-the-art, scientific approach..., theory, simulation..., conclusion and prospects).
