## Présentation

### Description

Judicial system and institutions is a course taught by two different lecturers. Each of them is in charge of different topics: specificities of French justice, French justice organization, operating principles of the French judicial system, alternative dispute resolution, judicial staff, justice and parliament, the French Cour de cassation, international courts and the way judgments are drafted.

With one of the lecturers, students have to make a presentation about one of the themes. With both lecturers, the students have a short examination about the topics examined during the previous sessions.
