

UE Proteomics for health research

 ECTS
3 crédits

 Composante
UFR Pharmacie

- **Langue(s) d'enseignement:** Anglais
- **Ouvert aux étudiants en échange:** Non

Présentation

Description

- Introduction to proteomic principles and applications.
- Principles of mass spectrometry.
- Protein analysis by mass spectrometry.
- Overview of separation methods and strategy.
- Principles of bioinformatics and identification methods in proteomics.
- Quantification methods in proteomics. Study of post-translational modifications.
- Data analysis, ontology.
- Interactomics.
- Methods for research and validation of biomarkers.
- Methods for characterization of biopharmaceutical products.

Heures d'enseignement

UE Proteomics for health research - TD	TD	14h
UE Proteomics for health research - CM	CM	11h

Période : Semestre 9
