

UE Geophysical Prospecting

 ECTS
3 credits

 Component
UFR PhITEM
(physique,
ingénierie, terre,
environnement,
mécanique)

 Semester
Automne

- › Teaching language(s): English, French
- › Open to exchange students: Yes
- › Code d'export Apogée: PAX7GEAC

Presentation

Description

This course is an introduction to the use of basic geophysical prospecting methods (seismic refraction, electrical sounding, EM mapping). An effort is made towards the processing and acquisition of data in the field and especially their interpretation in geological and hydrological terms in simple environments.

Course parts

CMTD	Lectures (CM) & Teaching Unit (UE)	18h
UE Geophysical Prospecting - terrain	Terrain	6h
