environnement,
mécanique)

Semester
Automne

- > **Teaching language(s):** English
- > **Open to exchange students:** Yes
- > **Code d'export Apogée:** PAX9NAAB

Presentation

Description

The Second year Research Training can take two different forms:

- 10 half-days spent in identified labs on recurrent subjects proposed by the coordinator of the teaching unit ;
- a part-time internship in a lab of the Grenoble area, representing more or less 1 day each week during a semester. It can be on the same subject as the M1 internships and/or of the future M2 internships, allowing a continuous immersion in a laboratory on a given for the whole duration of the master program. Students joining the program in M2 can also follow this program but they must readily find a welcoming lab by themselves prior to their arrival in Grenoble or at the very beginning of the academic year. In both cases, the module is evaluated through a short report followed by an oral examination, in which students expose their research objectives, implementation, and results, and answer to the questions of the jury.

Period : Semester 9
