

UE Software development tools and methods

Level
Baccalaureate
+5

ECTS
3 credits

Component
UFR IM2AG
(informatique,
mathématiques
et
mathématiques
appliquées)

Semester
Automne

- > **Teaching language(s):** English
- > **Open to exchange students:** Yes
- > **Code d'export Apogée:** GBX9AM18

Presentation

Description

The aim of this course is to study various useful applications, libraries and methods for software engineering related to applied mathematics. For example :

- C++ project management (git and/or svn)
- Development and profiling
- Boost library
- Linear algebra (Eigen)
- Prototyping and interfacing using Python
- Post processing and visualization tools (VTK, Paraview, GMSH)

This course deals with :

Topic 1: Software Engineering

Topic 2: Programming

Evaluation :

Practical sessions reports and oral presentation at the end of the course

Course parts

Lectures	Lectures (CM)	9h
Practical work	Practical work (TP)	30h

Period : Semester 9
