Baccalaureate
+5

ECTS
3 credits

Component
UFR PhITEM
(physique,
ingénierie, terre,
environnement,
mécanique)

Semester
Automne

- > **Teaching language(s):** English
- > **Open to exchange students:** Yes
- > **Code d'export Apogée:** PAX9NFAH

Presentation

Description

This course is a series of lectures that could be given in a thematic research school, ie at the intersection of training in a field and the presentation of the latest advances in it.

It consists in a weekly seminar on subjects related to condensed matter studied at the nanometer scale, highlighting fields of active research in soft condensed matter.
