

Master in Corporate management and administration

The programme offers the following course(s) :

- › Corporate management and administration 1st year
- › Twin qualification manager 2nd year
- › Applied corporate management 2nd year

Presentation

Three training programmes are available, all of them espousing a twin qualification dynamic:

- Manager twin qualification
- Applied corporate management
- Manager engineer

The Twin qualification manager and Manager engineer programs are general courses that differ in the language in which the courses are given. The final programme offers a twin qualification based on the international aspects of management. It is therefore also given in the English language.

The objective of the Corporate management and administration master's, the IAE's flagship degree, is to provide training in managerial competencies to students and/or executives already recognised for their specialist scientific, technical or legal skills etc. gained through initial 3rd year undergraduate or 1st year master's education or in the fields of : law, economics, management 2nd year master's. The Twin qualification manager program is part and parcel of this objective and is intended to train directors or executives whose careers destine them for senior positions, concentrating somewhat on the French context. The Manager engineer program provides a different take on the previous program but, this time, in an English-speaking context, which is intended to train directors or executives whose careers destine them for senior positions in an international environment. Finally, open to the issues of the international firm, the International Manager programme prepares students for management functions in international groups or the international departments of firms, providing training that incorporates the international dimension of managing organisations. Irrespective of the programme, graduates of the Corporate management and administration master's are well equipped for a broad range of positions and business sectors matching their original training and are widely represented among general management and marketing functions.

Registration and scholarships
