Parcours Advanced research in management of information systems 2e année

Master Management des systèmes d'information

Grenoble Alpes

Durée
1 an

Composante
Grenoble IAE - école supérieure de management de Grenoble INP, UGA

Langue(s) d'enseignement
Anglais

Présentation

The Master “Advanced ReseArch in Management of Information Systems” (ARAMIS) is a one-year program that offers students training in novel research techniques and methods and in-depth theoretical knowledge in information systems.
This program will provide students with an excellent understanding of the research process and a high level of specialized knowledge in information systems. The solid background acquired will prepare students to pursue careers in the management of information systems as as doctoral student (preparation to further advanced degrees (e.g. PhD), research analyst, information systems consultants or executives, consulting and auditing professions in information systems.

More info on the IAE's website.

Programme

Spécificités du programme

Semester 3

UE 1 - Knowledge and Information Management toward Innovation
- Knowledge Management toward Innovation
- Strategic scanning

UE 2 - MIS and Innovation
- IT and business models
- IS project management
- Information systems and ERP

UE 3 - Methods and concepts for research
- Qualitative method and text mining
- Quantitative method
- Organization theory

UE 4 - Entrepreneurship and innovation
- Innovative research project

Semester 4

UE 5 - Piloting and managing IS
- Auditing IS
- Big data and artificial intelligence in the supply chain

UE 6 - Professional skills
- Thesis
- Thesis defense

UE 7 - Social skills for research
- Entrepreneurship and communication for research
