

Master Management des systèmes d'information

Parcours Advanced research in management of information systems 2e année

Présentation

The Master "Advanced ReseArch in Management of Information Systems" (ARAMIS) is a one-year program that offers students training in novel research techniques and methods and in-depth theoretical knowledge in information systems.

This program will provide students with an excellent understanding of the research process and a high level of specialized knowledge in information systems. The solid background acquired will prepare students to pursue careers in the management of information systems as as doctoral student (preparation to further advanced degrees (e.g. PhD), research analyst, information systems consultants or executives, consulting and auditing professions in information systems.

More info on the [IAE's website](#).
