

## Master in Industrial engineering

# Sustainable industrial engineering

## Presentation

---

Industry is of critical importance for the global economy. Industrial engineering is the branch of engineering that is concerned with the efficient production of industrial goods as affected by elements such as plant and procedural design, the management of materials and energy, and the integration of workers within the overall system. Sustainable industrial engineering addresses the issue of sustainability of industry in three ways : from an environmental point of view, from a social and societal point of view, from an economical point of view. Sustainable industrial engineering has myriads of application fields since it encompasses the whole value chain and lifecycle of products : from the development of new and innovative machines, products-services to the market and recyclability.

## Registration and scholarships

---

- To integrate a master's degree in the 1st year, you must have a 3rd year bachelor's degree or equivalent. Your course must be in line with the master you want to integrate. Recruitment and registration procedures are specified directly at the specialty level. For the 2 courses in French, the choice of course is made after admission to the master's degree in Industrial engineering
- To be accepted for a master 2nd year, you must hold a master 1st degree or equivalent. Your previous studies must be compatible with the master you wish to study. The recruitment and registration conditions are stated for each specialty.

See [Grenoble INP website](#)

## Practicals informations :

---

- > Component : Grenoble INP - Génie industriel (Conception de produits ou de services, gestion de production et logistique)
- > Duration : 2 years
- > Course type : Initial and Continuing Education
- > Location(s) : Grenoble - Doyen Gosse
